MONITOR SPORTS DAY JULY FIRST

THE MONITOR NEWS

VOL. 5 MONITOR, ALBERTA, FRIDAY, APRIL 30th 1920. NO. 19

Local Happenings

STONELAW U. F. A.

will hold their meetings dur the summer as follows:- May, July and September at Stonelaw. June, August and October at Minor. 1st saturday

CHANGE IN TRAIN SERVICE

TRANS-CANADA Limited, all standard sleeping cars Trains 7 and 8, between Montreal, Toronto and Vancouver, will be resumed first train from Montreal and Vancouvor May 2nd.

Times for trains at MONITOR will be

Eastbound

No. 618, daily x Sun. ar 11.40am lv 12.40 nn

Westbound

No. 617, daily x Sun. 3.05 pm

SOO - PACIFIC Express, Trains 13 14, between St. Paul and Vancouvor will be resumed first train from St. Paul May 29 th, first train from Vancouvor May 30th, 1920.

For further particulars apply to any Ticket Agent.

J. E. PROCTOR
District Passenger Agent.
Calgary.

The Tennis season was opened in Monitor on Friday of last week, when Messrs Moth and Warner played a couple of sets. The courts are in fair shape but need a little fixing up to make them real good. Now then, tennisists get busy and take the crimp out of your racquets.

Mr. Ferguson has had a new window put in his store, replacing the one broken by accident some little time ago. Plate glass Insurance can be obtained at the News Office at very reasonable rates.

Miss Jeannie Oliver has accepted a position in T. H. Ferguson Store.

A wet spring means lot of Hail. Unless you are prepared it will mean lots loss to yourself in the event of your being hailed out, unless you are wise enough to take a Hail Insurance Policy. See Warner, and get one taken out as soon as your grain shows above ground.

Miss Cameron has returned to her position in the Canadian Bank of Commerce after spending a few weeks at her home for Easter Vacation. J. H. Galbraith of the local Bank Staff has bouth a Savage rifle (make your own beam out'a that)

H. L. Crisp, of Plymouth Rock Ranch has severed his connection with A. J. Deadmarsh's Store. He leaves tonight for the ranch.

Local Happenings

Messrs Waters and Galbraith of the Bank staff here have purchased a genuine Lizzie. After trying to run the blooming thing on beer and other substitutes for the original gas, they have found that the ole girl wil son run on moonshine. In the meantime they are burning gasoline.

Mr. J. Hamer has moved the shack that was at the end of his harness shop to the rear of his lot on Consort Street. Looks as though Joe was going into the wholesale chicken business (birds we mean) or else is going to indulge in a Ford.

Mr. A. Grace had a large addition to his family last week, when 13 new chickens arrived on the scene. 13 chickens from a setting of 13 eggs speaks well for the fertility of the eggs.

Sam Lee's Laundry has received a new coat of paint, and a fine new sign. Another improvement to our town.

We understand Rev. Wright has been appointed to the office of Sec-Treas. of the Village Council. The Council must sure be a tough bunch, and in continual need of a spiritual adviser, for no sooner does one minister resign the job, than another is appointed. Boy, page Sherlock Holmes.

Our local Bank staff are certainly doing their share towards the eradication of the gopher pest. To date they have about 4000 rodents to their credit. Being possessed of a Ford car, a supply of rifles and ammunition, they are certainly keeping in trim for the next war. If we had two banks here there wouldnt be any necessity for gopher-poison.

The Ladies Aid meet at the home of Mrs. Stensland on Wednesday next, May 5th,

A general meeting for the election of a School Trustee was held at the school on Monday last. Meeting was opened at 3 p.m. by chairman, A. Grace and nominations received. There were but two nominations, T. H. Ferguson, [moved by Vosburgh, seconded by Warner] and W. H. Olson, [moved by Crisp, seconded by Bergman] Voting was proceeded with and at the close of the poll, it was found that W. H. Olson had been elected by a vote of 18-10. The Board of Trustees is now composed of Messrs Grace [chairman] Blair and Olson.

Even a Ford car has its limitations. After gliding down the Main stem on fender and two wheels, the Ford belonging to Messrs Waters and Galbraith absolutet refused to climb through the key-hole of the Bank front door, although every persuasion was used. "Doug" Water was driving at the time, and it is possible that he was endeavoring to emulate the other "Doug" in some of his hair-raising stunts. However, on investigating it was found that the radius rods of the car were rather badly bent, so the whole family repaired the garage fyr repairs. In future, Doug says he will let someone open the door before he drives in.

The much-vaunted baseball-sprit received a wallop last Monday, when the meeting of those interested was supposed to be held in the Rest Room. There were the huge crowd of 0000 present. Apparent no one is responsible for the calling of the meeting, everyone forgot about it [or pretended to] and so another opportunity has slipped into the "might-have-beens" It seems to be the idea that the business men of the town are to organize the baseball club, buy suits, bats, balls and so forth, and then take a chance that there will be enough players here to play ball. The sooner that idea is dispersed the better. If the players themselves, have not enough pep to organize a team for themselves, and get out and make a showing anyhow, how can they expect the business men of town to assist them. Did the business men organize the O. N. O. Club? or the Tennis Culb? or Band? or the Chior? No, certainly not. Take a tip boys. Show you have some interest in the game yourself before you tax others with having no interest.

A Tennis meeting will be held next Wednesday at 8 p.m. in the Rest Room. O. N. O. Club.

The Market

A bunch of Opportunities

Sounding Lake U. F. A. general meeting 1st Saturday in each month 8 p.m, at Horse Shoe Schoolhouse.

For Canadians to Consider

The national debt of Canada has now reached a figure of approximately $3,000,000,000. This is the gross debt. The net debt, that is after deduction of assets has been made, is now around $2,000,000,000. It must be borne in mind, however, that many items included in the statement of assets are not such in the recognized commercial meaning of the term; in fact, no inconsiderable portion of what are termed assets are, for the time being at least, more in the nature of liabilities. For example, Canada has some hundreds of millions of dollars invested in the National Railways, and the latter are regarded as an asset, but as a matter of fact and common knowledge these railways are not earning operating expenses, not to mention interest on the capital invested in them. Consequently, in casting up the national balance sheet, the people must be taxed to meet both operating deficits and the whole interest outlay on the money invested in, and the stocks, bonds and debentures outstanding against these railways.

For the current year it is estimated that no less a sum than $350,000,000 will be required to meet ordinary expenditures, and a further substantial addition must be made to the national debt to cover certain capital expenditures to which the country is already committed and which cannot be avoided.

Of this $350,000,000, about $125,000,000 will be eaten up as interest on the public debt. In the neighborhood of $50,000,000 will be required to cover operating deficits and interest payments on account of the national railways. Thus these two items alone will dispose of one-half of the entire revenue.

Out of the remaining $175,000,000 some tens of millions must be paid out in pensions, vocational training for soldiers, hospital accommodation and treatment for soldiers, and in various forms of soldiers' civil re-establishment work. Some millions are to be spent in grants on a population basis to the provinces for highway construction; a few millions will be used to meet the deficit in the operation of the post office department; and all the expenses of government, including the Civil Service, administration of justice, militia and police establishment, subsidies to the provinces, and all the mutiplicity of services devolving upon the Federal Government must be met.

The people of Canada, who are the taxpayers, and who must bear the burden of providing the money to meet all these obligations, must seriously consider the national situation, and especially so at times when they may be inclined to urge additional expenditures of one kind or another for very laudable and even necessary purposes. Canada must, however, curtail its expenditures to a point where they can be covered by the revenue. This country cannot continue living on borrowed money and by going still deeper into debt. There must be national as well as individual retrenchment. Instead of getting deeper into debt, the time approaches when we must agree to still heavier taxation in order to begin the process of liquidating the national debt, as it is now being done in Great Britain.

There is nothing in the national situation, however, to despair over or become pessimistic abut. Canada has the resources and the energy and the ability to meet all its obligations, proceed with its development, and add to the wealth, prosperity and happiness of its people. But it cannot be accomplished by continual criticism, by seeking to tear down existing institutions in order to apply a lot of unbaked theories and untested methods The world, Canada included, has had enough of destruction within the past five or six years. What is now necessary is constructive enterprise, and that can only be brought about by work, and by people generally realizing that it is impossible to get something for nothing; that, on the contrary, the present tendency of most people to be slackers at their job, to insist upon double the wages formerly received in return for about half as much labor and effort on their part, must be abandoned.

Hard work is in sight for most of us. If we do not make up our minds to undertake such work now, buckle down to our jobs, and produce to the maximum of our powers in whatever occupation we may be engaged, at the same time cutting out luxuries, and saving the last possible dollar.—well, we are but slightly delaying the time when dire force of necessity will compel us to do these things, and the longer the delay before doing what we ought to do, the greater the loss and the more severe the penalty will be.

If we don't eliminate luxuries and save now; if we still think we can produce less and consume more; if we continue to delude ourselves that we can indefinitely continue to receive double pay for half as much work, nothing can prevent hard times. If such times come as a result of our folly, we will not only do without luxuries, but may find ourselves hard pressed to obtain necessities.

There is only one solution, in Canada as elsewhere. It is not theorizing; it is work—hard, practical, productive work.

Nutmegs are kernels of the fruit of a tree cultivated in Sumatra, Java and the West Indies. The shape and size of this fruit resembles a peach, and when ripe, it easily splits in two parts, showing the kernel (or nutmeg) and mace, which surrounds it.

It is just fifty years since the method of grinding wood as raw material for paper was introduced in the United States.

For Good Films

Manitoba Takes Lead in Encouraging British and Canadian Sentiment

The Good Films Committee desire to go on record as being heartily in accord with all movements tending to raise the standard of Motion Picture entertainments in Manitoba with a view to encouraging British and Canadian sentiment and clean ideals of family life.

The committee urge a closer co-operation between the board of censors and the citizen in order that the public may have a fuller understanding of the wide-spread influence of this universal form of recreation, which is undoubtedly doing much to mould the sentiment of the rising generation.

It is strongly advocated that constantly recurring ideas and suggestions in pictures dealing with seduction and infidelity; shady methods of divorce; vicious underworld characters and methods of life; sex immorality; and the depiction of assault upon women be suppressed.

The lead taken by Manitoba in this connection might well be followed by the other prairie provinces. The educational value of the moving picture is second only to our newspapers, and it is therefore of paramount importance that pictures depicting only the highest and best ideals should be shown. Let everyone interest themselves in helping to raise the standard of motion picture productions.

Minard's Liniment Cures Dandruff.

Wise men always do a little hustling on their own account while waiting for good luck to come and pay them a visit.

He Has Tried Them And Got Results

WHY A. J. MACLEOD PRAISES DODD'S KIDNEY PILLS

Nova Scotia Man Gives the Reason Why He Advises Sufferers From Kidney Trouble to Use Dodd's Kidney Pills.

River Dennis, N.S., April 26th. —(Special.)—"Dodd's kidney pills helped me wonderfully. My back is better and as I haven't taken any other medicine since starting to take them, they must have done me a lot of good."

In these words, Alexander J. MacLeod, a well-known resident here gives his reason why he praises Dodd's Kidney Pills and why he says, "I would advise anybody who has kidney trouble to give Dodd's Kidney Pills a trial."

The reason Dodd's Kidney Pills are popular all over Canada is that people have tried them and found them good. Dodd's Kidney Pills have been in use in Canada for more than thirty years They have been used by thousands of people suffering from various forms of kidney trouble, such as rheumatism, dropsy, sore back, weakness, diabetes and Bright's disease.

Ask any one of these thousands to give you his opinion of Dodd's Kidney Pills. It is on the relief afforded sufferers from kidney trouble that Dodd's Kidney Pills have built their reputation as the sovereign remedy for sick kidneys.

Demand for Men Better

34,440 Workers Were Placed During Month of March

The employment situation in Canada is improving, according to figures published in the Labor Gazette for April. The employment service connected with the department of labor placed altogether 34,400 people in employment during the month of March and received 41,700 applications for employment. The department was notified of 38,200 vacancies. All these figures represent an increase over the previous month and the previous year There was a steady increase in employment in all provinces except the prairies, where a decline was reported.

There was less loss of time due to strikes in March, 22 strikes were reported, involving 3,789 people and representing a loss of 43,169 working days. Sixteen strikes remained unsettled at the end of the month. Reports were received from five conciliation boards and applications were received for five more. Two boards were appointed in addition to these on application received previously.

The triple alliance of Germany, Austria and Italy was formed March 13, 1887.

Insures long life

Imperial Mica Axle Grease and Imperial Eureka Harness Oil insure long life for wagons and harness. Put up in convenient sizes and sold by dealers everywhere.

Imperial Mica Axle Grease

—not only lubricates, but smooths the surface of the axle and hub with a coating of powdered mica, thus reducing friction and lessening the strain on horses and harness.

Imperial Eureka Harness Oil

keeps harness straps and tugs pliable and strong, prevents cracking and breaking of stitches. It preserves harness against the action of sweat, moisture and dust, also wards off insects. Imperial Eureka Harness Oil imparts a rich, black, lasting finish.

National Research Institute

Institution Would Meet The Requirements for Developing the Natural Resources

Plans for the establishment of a national research institute for Canada, were before the commons committee on scietific research recently. It was recommended that a site of at least 5 acres should be secured near Ottawa and a building of laboratory type four stories in height, to cost $500,000 to be erected.

The scientific instruments required would cost approximately $100,000 and salaries would require about $100,000 per annum.

This institute would be similar to the bureau of standards at Washington and the Mellon institute at Pittsburgh. It was felt that such an institution would meet the most pressing requirements for developing natural resources and make provision for assistance to Canadian industries.

A bill covering the establishment of such an institution is to be drafted by a sub-committee composed of Dr. S. B. Steele, Dr. Thompson (Yukon), and Dr. R. J. Manion (Fort William), who will report back to the committee.

Minard's Liniment for sale everywhere.

More Drastic Methods

If the Sinn Feiners were carrying on operations under the stars and stripes, instead of the Union Jack, the whole Sinn Fein movement, like ancient Gaul, could be divided into three parts—one part in the graveyard; one part in the penitentiary; and the other part in process of being shot into the cells or the cemetery.—Toronto Telegram.

Fowler's Grape Cider
"IT'S MIGHTY GOOD"
Buy It By the Gallon
From Your Dealer

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!

Canada Secures Orders in Roumania

The Canadian Association of Woollen Manufacturers has secured orders in Roumania to the value of $2,500,000. The association sent an agent to Roumania to handle lines of Canadian woollens in south-eastern Europe.

A Food That Builds!

Grape-Nuts

A staunch food made of wheat and malted barley, — ready to eat, easily digested, and full of sound nourishment

For those who work with brain or brawn there is no better breakfast or lunch than

Western Provinces Are Forging Ahead In Dairy Production

Canada's dairy product yielded approximately $250,000,000 in 1919. Of this amount, about $65,000,000 was received for exports. These figures easily constitute a record for the Canadian dairy industry. In 1910, the total value was estimated at $100,000.00 and the exports amounted to $24,000,000. Although the production of most dairy products made a fairly constant increase during the period of the war, the phenomenal record of 1919 must be attributed in large measures to the market conditions. In common with other food products, the prices of milk, butter and cheese rose rapidly to a world shortage. Then, too, the more rapid growth of urban centres as compared with the rural population has enlarged the home market, without a corresponding increase in production. Further the shortage of labor on farms throughout the war restricted increased production materially, and the comparatively rapid expansion of the condensed and powdered milk trade affected cheese industry adversely. Each of these factors tended to increase prices. Thus in 1918, the average price paid for cheese by the Dairy Produce Commission was 23, cents, f.o.b., steamship, at Montreal. Although similar statistics are not available for 1919, it is probable that the price exceeded 27 cents. Butter prices also established new records, the average prices for all grades of creamery delivered at Montreal, was 53½ cents in 1919. While the production of cheese probably showed a slight decline, the past year can be credited with a record production of butter and condensed and powdered milk.

Western Canada, especially the prairie provinces, is rapidly increasing its production of milk and butter. At present Ontario and Quebec easily lead the other provinces, but with a more general realization of the need for conserving soil fertility on the prairies, dairying will progress prodigously.

Modern, co-operative dairying is less than fifty years old. Already it has played an outstanding part in giving such countries as Denmark and New Zealand economic independence. It has been proved beyond peradventure that no other branch of farming surpasses it in maintaining and improving soil fertility. However, it would be unreasonable to expect that prices can long continue at the present high levels. On the other hand, labor conditions should steadily improve and advances will be made in labor saving devices. It seems reasonably certain that dairying is destined to be an increasingly large economic factor in the future of Canada.—A. Donnell.

De-Horning Adds to Value

A New Zest Shown in Canadian Cattle Campaign

A zest has entered into the campaign for de-horning Canadian cattle. The example of the most successful farmers is being copied by those quick to see the money-value of the idea.

Probably a quarter of a million dollars a year are lost to farmers by the non-practice of a simple de-horning process.

Live stock exchanges in Winnipeg, Toronto and Montreal especially encourage de-horning. Practically all the American native cattle, with which Canadian farmers in the West have to compete, have the advantage of being thus treated. They bring a larger return in dollars and cents.

In a circular by the Dominion government, farmers are told they will benefit briefly for the following reasons: 1. Better appearance of the cattle; 2. Quieter, subdued nature, enabling fattening at less cost; 3. More cattle can be shipped in one car by rail, saving freight cost.

But it is when the animal is finally brought to slaughter that the value of de-horning is proved. Over 70,000 lbs of meat a year are actually reported at inspected Canadian packing plants alone as wasted through bruises in the flesh. Most of the bruises are caused by the animals horns while in transit from the farm to the market and the abattoir.

That total represents the parts of meat utterly thrown away. There is a farther and even greater loss. When a piece of meat is removed from quarter of beef because of a bruise, the rest of the quarter or part of it, has often to be sold at a cent and one-half or two cents a pound less—not because the meat is poor, but because that part of it has lost in appearance and sale value. Probably one in every five cattle bought on Canadian stock yards suffers from injury which could be prevented were de-horning commonly practised. The packers' buyer necessarily takes the loss into account and the farmer who sells the cattle takes the risk and a lower price.

A united effort is now being made by the Dominion and Provincial Departments of Agriculture, the live stock exchanges throughout Canada, and the meat packers collectively to get a better knowledge diffused among Canadian farmers of the real importance of de-horning.

Some Facts About Wheat Growing On Western Prairies

Wheat is Canada's most important crop. It covers 36 percent of the land in crops and forms 25 percent of the value of all crops. The centres of production are in the plains provinces and the peninsular of Ontario, the former being by far the most important. Saskatchewan alone has more than one-half of the wheat acreage of the Dominion and ranks highest in the value of wheat relative to that of all crops. Manitoba and Alberta together, have more than three-fourths of the balance.

The Canadian crop is mainly spring-sown, but winter wheat is found in Ontario and Alberta, and a small acreage in Manitoba. In Ontario the heavy snows and lack of extreme temperatures favor winter wheat. High rainfall (30 to 40 inches), and humidity produce also a soft wheat. Southern Alberta, owing in part to the warming influence of Chinook winds, has a shorter and milder winter than the other western provinces. Owing to the dry climate the wheat is very hard. (The small amount of winter wheat grown in Manitoba is produced in the wooded parts of the north, chiefly in the Swan River Valley. Owing to the semi-humid conditions this wheat is 'piebald' or at best semi-hard.) The great wheat belt of Western Canada is limited on the north by a short growing season and low summer temperature, and on the southwest by insufficient rainfall.

The small population of Canada does not require the entire supply of wheat produced. On the average over one-half of the crop is exported and the exportable supply is increasing annually. At the same time, Canada has the highest per capita consumption of wheat in the world (16 bushels including wheat used for seed)."

The wheat crop of Western Canada is at present largely confined to the open plains region of the prairie provinces. This area has been found cheaper to "break" and being less liable to early fall frosts has been the first to be developed for wheat growing. It will be noticed that over 95 percent of the crop in the prairie provinces is spring wheat. In southern Alberta rather more than ten percent of the crop is winter wheat. In northern Manitoba a very small acreage of winter wheat is grown around Swan River.

In all the prairie areas the wheat is very hard and of high quality when satisfactorily matured. This applies to both the spring and winter types. The spring wheat grown in the park belt is likely to be piebald or semi-hard, and the winter wheat at present grown in the Swan River Valley is of similar texture.

The soil conditions that in general meet these requirements are the fallow, "breaking" and corn ground or land having produced some other hoed crop. Fall plowing and stubble land are, however, frequently sown to wheat. Under the rotations followed at present, the wheat acreage is chiefly composed of fallow and fall plowing. Each of these methods of preparations have some disadvantages and some advantages under different conditions of soil and climate. These may be briefly stated as follows:

The fallow is the name applied to land that has lain idle for a year, no growth of crop or weeds having been permitted, and the soil tilled in such a manner as to store and conserve the moisture. The chief advantages of the fallow are in (1) its at least partial insurance against drought (2), the development of available plant food in the soil (3) the destruction of weeds and weed seeds (4) it is (on most soils) ready to sow as soon as spring opens up and (5) it permits of a better distribution of farm work.

The disadvantages of the fallow are many: (1) it results in the loss of the use of the land for a year (2) the soil tends to drift as the result of too fine and loose a surface (3) on heavy soils the fallow unduly delays ripening (4) in wet seasons, particularly on heavy soils, the crop is made more subject to serious rust damage, or it may lodge (5) the necessary tillage of the fallow usually costs more than the tillage of land cropped every year and (6) fallowing causes a serious loss of organic matter and nitrogen from the soil.— Extract from article by Prof. John Bracken.

Lightning Dangers Of Early Spring

Wire Fences to Protect Your Cattle During Storms

Though electric storms reach their highest frequency during the heat of summer they often occur in the spring and fire losses caused by lightning are by no means unknown in April and May.

Lightning rods have proved an almost absolute protection. Only in very rare instances have they been known to fail, and even in these cases, the failure was probably due to defect in installation or to deterioration.

Examine your lightning rod installations for broken insulators, for bends in the cable which allow contact with the framework, or for corrosion where it enters the earth. The latter is an important point. The electricity is carried into the ground by means of the cable, but, if it corrodes, and the ground connection is thereby broken, a fire is very liable to result. See to it that the cable is sound and is deep enough in the ground to always be in damp earth.

When building wire fences it is advisable to use ground wires about every five rods. Lightning is attracted by wire fencing and as, during a storm, animals will congregate near to fences, many of them are killed by contact with the wire. These ground wires may be of about No. 9 gauge wire, given one turn around each strand of the fence, and carried into the earth beside the fencepost.

Trapping is Profitable

Prosperous Indians Must Pay More For Getting Intoxicated

Fur trapping, to the men who know how to carry on operations, is profitable this season, according to game guardians who have returned to headquarters from inspection trips with stories of the large sums made in the north of the province. A half breed, after two weeks of trapping, sold his catch of mink, marten, and fox for $600; another made over $2,000 in a month. Five dollars a skin is being paid the Indians for muskrats and some of them are enjoying their prosperity to such an extent that magistrates in the north, who heretofore have used two skins as a basis of fine for drunkenness, have served notice that henceforth the fine will be three skins and costs in addition.

The new republic of Czecho-Slovakia has an area of between 50,000 and 60,000 square miles and a population of 12,500,000.

Farmers Must Tighten Up

The Banks Have Given the Word in Western Canada

Farmers are warned against a period of tight money by the manager of the rural service department of the Merchant's Bank of Canada, J. L. Clarke, with headquarters at Regina. He stated that the bank would continue to lend for ordinary farm needs, but advised against the undertaking of any large program of extension. Mr. Clarke has just returned from a visit to the East and the United States. He said that in the markets only the old and tried stocks were finding a sale. He was much impressed by the number of Americans who were preparing to come to Canada.

Experimental Farm to Grow Sunflowers

Four acres of Russian sunflowers will be planted at the Dominion Experimental Farm at Lethbridge, Alberta, this spring, and superintendent Fairfield is going to make a strenuous effort to beat the 34.6 yield record established by G. H. Hutton on the C. P.R. Demonstrative Farm at Strathmore last year. A silo is now being built on the farm, and there will be no question about carrying the sunflower experiment to its proper conclusion next winter.

Camels are fit for work at five years old; although they usually live forty years their strength begins to decline at twenty-five.

B. C. May Have Iron Industry

Soon British Columbia may find herself in possession of an iron and steel industry, launched and operated by the government of the province, Hon. William Sloan, minister of mines, stated in the legislature on the second reading of the bill to extend the operative period of the Iron Ore Bounties act until 1925. The bill, he said, was in line with the government's policy to leave nothing undone to bring about establishment of an iron and steel industry.

At the signing of the armistice, the total of German bombing and scouting aeroplanes had fallen to 1,700 while, the allies had three machines on the front to every German one.

Coolies for The West

Oriental Solution of Labor Problem Still Being Considered

The proposal which it is understood has been made to the Ottawa government to bring Chinese coolies to western Canada to carry on railway construction and similar work, under an arrangement similar to that which was employed on the western front during the war, is engaging the attention of various boards of trade and others.

Chilled fish from Newfoundland is prepared in a cold storage plant which has a capacity for handling over 200,000 pounds of fish a day.

Prohibition A Success

Canada Not Injured By Liquor Laws Says Bishop

Bishop Richardson, of Fredericton, N.B., in a lengthy letter to the London Times, disputes Professor Stephen Leacock's recent assertion in the same journal that prohibition has been an appalling disaster to Canada and the United States. The bishop says that Prof. Leacock is so closely associated with a certain delightful humor, that it is not always easy to tell when he intends to be taken seriously, but to solemnly affirm that the supporters of prohibition are possessed solely by the enjoyment of persecuting their fellows would be offensive from any other writer.

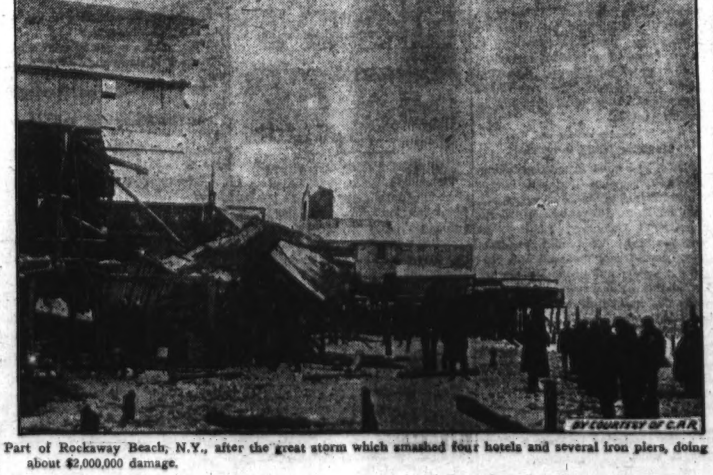
"I admit frankly there are some grave weaknesses in the enforcement of the prohibition law," continues Bishop Richardson, "but I am profoundly convinced that prohibition brought with it moral and economic benefits of untold value which far more than compensate for any losses. The adoption of the prohibition law in Canada, considered as a whole, is as far from being an appalling disaster, has become a magnificent success."

Cattle Breeders Plan Sale

Manitoba cattle breeders have decided to hold a sale in the Exhibition park, Brandon, on Wednesday June 2, entries to close May 5. All animals entered are to be subject to inspection by a committee appointed by the board.

To Grow Hemp in Manitoba

J. Lohr, for many years proprietor of the Jas. J. Hill farm at Northcote, Man., is reported to have purchased 7,200 acres of land at Gunton, Man., where he will grow hemp, if conditions warrant the experiment. Otherwise, flax will be the crop sown.



Part of Rockaway Beach, N.Y., after the great storm which smashed four hotels and several iron piers, doing about $2,000,000 damage.

PIMPLES ON FACE CUTICURA HEALS

Caused Disfigurement, Itchy and Burning. Had Restless Nights.

"My face came out in little pimples that were sore, and I scratched them constantly, and then they turned into scales, causing much disfigurement. The skin was so itchy that I irritated it by scratching. The burning was fierce, and I had many restless nights.

"This trouble lasted about a year before I used Cuticura Soap and Ointment, and after using three cakes of Soap and two boxes of Ointment I was healed." (Signed) W. Byrns, St. Basile, Que., Nov. 23, 1918.

Make Cuticura Soap, Ointment and Talcum your daily toilet preparations.

For free sample each of Cuticura Soap, Ointment and Talcum address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

Trees for Roadsides

Wind-Break to Prevent Early Frosts And Other Evils

Newer Canada will learn as older parts of the Dominion have had to learn the value of trees both in wood areas and on the roadside. Dr. W. W. Andrews recently addressed a gathering of members of the Kiwanis Club at Regina on tree planting in the country planning.

The doctor dealt very fully with the question of planting trees on either side of the main roads in Saskatchewan, and made the positive statement that if such were done, autos could be used for twelve months in the year instead of about half that length of time as is the case now. In order to do this, the gauge of sleighs must also be enlarged, a matter which has been mooted for some time.

A line of trees on either side of the road would prevent the drifts from congregating on the highway itself, and thus, where the sleighs and autos would run, the ordinary fall of snow would obtain. The trees, forming a wind-break, would also keep the wayfarer warm.

The value of trees from the viewpoint of keeping water in the ground was also made apparent by the speaker, and again as a wind-break to prevent early frosts and other evils which are the enemies of crops.

The U. S. And Mexico

The United States is the most backward of fully civilized nations. It has rejected the opportunity to associate itself with other powers in the greatest advance for better, safer and happier conditions for mankind and for nations that has been made in all history. All the Latin-American countries of South and Central America have now become members of the League of Nations. They have pledged their support to the covenant of peace. Venezuela even has joined the League. In the whole New World only Mexico and the United States stand aloof, and for precisely the same reason—the violence and virulence of their domestic politics. — From the New York Times.

Good Prospects for Crop

"I consider the prospects for the coming season on the land are the best in several years," says F. W. Crandell, of Calgary, one of the largest individual farmers in Alberta.

Mr. Crandell states that he expects to put about 10,000 acres into crop this year. The moisture conditions, he says, are ideal. There has been a heavy fall of snow which has gone off gradually, furnishing moisture to the soil.

This opinion is shared by experienced farmers in all parts of the province, and all indications are favorable to a heavy crop this season.

Prince Edward's Alberta Ranch

Will be of Great Importance to the Business of Stock-breeding In Western Canada

The plans of the Prince of Wales for his ranch in Alberta are described by the agricultural correspondent of the London Times. Its 7,000 acres he says, are entirely under grass and at present it is without suitable or adequate buildings. The soil is a rich alluvial loam, and the grasses it carries are luxuriant and provide good feeding for stock in summer and winter. A certain area is mowed every year to provide hay for young stock in winter, but the greater part is grazed throughout the year. The climate is severe, but cattle and horses can be out-wintered with safety and advantage. The summer production of grass exceeds the present requirements of the stock on a properly managed ranch, and the surplus, then withered and dry, but of about the same feeding value as English hay, suffices to carry the animals through the winter. The climate renders this simple system of "haymaking" completely practicable in Alberta, and only the needs of young stock housed in winter have to be provided in the elaborate British method.

Although there is no arable land within the limits of the E.P. ranch at present, the acquisition of cultivated land is contemplated, with a view to making the ranch better adapted to the requirements of the improved classes of cattle and sheep it is proposed to introduce. With the same object, suitable buildings and fencing are to be erected in due course.

The ranch is to be stocked with cattle, horses and sheep. Hitherto horses have been bred chiefly, but cattle-raising will form the main feature under his royal highness' ownership. The immediate supervision of the ranch will be entrusted to Professor Carlyle, who, with Mr Lane's approval, will add this task to his managerial duties on the latter's famous Bar U ranch of 120,000 acres. The stock to be sent out from England will comprise shorthorn cattle, thorough-bred horses, Dartmoor ponies, Dartmoor Arab crosses, and Shropshire and Kerry Hill (Wales) sheep. The consignments of cattle, ponies, and pony-Arab crosses can be supplied mainly from the Prince's farm in Cornwall and Devon, and selections of the thoroughbred horses have already been made at Newmarket, while the close-woolled sheep of Shropshire and North Wales are preferred because of their proved suitability for the climate.

The breeding of shorthorn cattle, will be the principal enterprise, and the royal owner is fortunate in being in a position to supply from his noted herd in England most of the shipment of about a score of highly-bred Cruickshank shorthorns that are to form the nucleus of the new herd. The ranch is capable of carrying about 700 head of cattle in addition to other stock. At first the herd will consist principally of the ordinary grade cattle of the district, but as the pure bred strains multiply and prosper the commoner kinds will be displaced by registered shorthorns of the best families and types.

The enterprise would be important and of wide interest if it were merely to be conducted on the ordinary ranching lines; the system of management it is proposed to pursue increases its value and intensifies its significance. The E. P. ranch is to be the home of a herd of pure-bred shorthorns of the beeving type that should be of inestimable importance to the business of stock-breeding in western Canada.

Medicine Hat's Industries

One of the most interesting industries in the province of Alberta is that of manufacturing linseed oil cakes, etc. from flax as carried on by the Alberta Linseed Oil Company, Limited, at Medicine Hat. This mill consumes large quantities of flax-seed and provides a ready and profitable market for Southern Alberta flax. The by-product of linseed oil crushing, namely oil cake or oil cake meal, is sold by this company under the brand of "Pride of Alberta," and is one of the most satisfactory stock foods on the market. It is also used to great advantage by stockmen.

Labor troubles are often caused by men who are trying to make a living without work.

Postpone Cattle Sale

Mammoth Pure-Bred Sale Will Now Be Held on June 2 and 3

A conference between the board of directors of the Saskatchewan Cattle Breeders' Association and J. G. Thompson, commissioner of livestock for the province, was held for the purpose of changing the date and arranging other details of the mammoth pure-bred cattle sale that is to be held in Saskatoon in June. The date originally set was for May 26-27, but owing to the lateness of spring it was thought that the farmers and live-stock raisers in the northern part of the province would not be through the seeding before June 1. Consequently the date was changed to June 2-3, when the sale will be held at the Saskatoon Exhibition Grounds.

CHILDREN OF ALL AGES

Children of all ages—whether it be the new-born babe or the growing child—have to be constantly guarded as to their health. Upon the good health of the little one largely depends his strength and usefulness in after years. Baby's Own Tablets are the ideal home medicine for children of all ages. They are a gentle but thorough laxative which are absolutely guaranteed to be free from opiates or other harmful drugs and which may be given to the youngest child with perfect safety and beneficial results. Through their action on the bowels and stomach they banish constipation and indigestion; break up colds and simple fevers and make teething easy. Mothers, you can make your little one well and keep them well by just keeping a box of the Tablets at hand and by giving an occasional dose to the baby to keep his little bowels regular and his stomach sweet. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Returned Men Are Going on the Land

Soldiers Get First Choice of Reserve Land At Calgary Sale

Twenty-four parcels of land, the approximate value of which is in the neighborhood of $75,000, were disposed of on the first day of the sale of the Hudson's Bay reserve lands, held in the offices of the soldier settlement board at Calgary. The lands were sold to returned soldier farmers who held qualification certificates issued by the board.

The twenty-four prospective purchasers drew lots for choice of the parcels, and the lucky number one was drawn by a soldier named Calde, who was given his choice of the entire reserve. Needless to say, the lucky man picked out the choicest quarter on the reserve.

DON'T NEGLECT A RHEUMATIC PAIN

Go after it with Sloan's Liniment before it gets dangerous

Apply a little, don't rub, let it penetrate, and—good-by twinge! Same for external aches, pains, strains, stiffness of joints or muscles, lameness, bruises.

Instant relief without mussiness or soiled clothing. Reliable—the biggest selling liniment year after year. Economical by reason of enormous sales. Keep a big bottle ready at all times. Ask your druggist for Sloan's Liniment. 35c, 70c, $1.40. Made in Canada.

Sloan's Liniment *Keep it handy*

Holland Taking Precautions

Holland is taking precautions against the possibility of plots by the extremist elements. A bill just made public embodies measures for counter-action against such plots, including any that might be hatched outside of Holland.

A woman is really in a hurry if she says goodbye that way.

MURINE FOR YOUR EYES Rests, Refreshes, Soothes, Heals—Keep your Eyes Strong and Healthy. If they Tire, Smart, Itch, or Burn, if Sore, Irritated, Inflamed or Granulated, use Murine often. Safe for Infant or Adult. At all Druggists in Canada. Write for Free Eye Book. Murine Company, Chicago, U. S. A.

Want Air Supremacy

Germans Constructing Giant Commercial and Passenger Airships

The Germans are working feverishly to construct giant commercial and passenger airships and airplanes, according to a report from Romanshorn. The first trials were successfully held of two monster machine above Lake Constance.

The airship Nordstern, greatly surpassing the Zeppelin Bodensee in size, capacity and power, flew for a half hour around the lake with a crew of seven men. At the same time a new giant hydroplane, whose motors totalled 1,000 horse-power, made aerial trips with 20 passengers.

Both machines were recently completed at Friedrichshaven, where the airship factory is said to have doubled in size since the armistice, and other monsters have already been begun. The Germans are concealing the results of the trials, and no reports of them are published in the press.

It has been positively ascertained by expert chemical analysis that rice contains more nutritive elements than any other grain. It will sustain life better and longer than any other cereal—a fact well known throughout the eastern countries from time immemorial.

DOUBLE BEAUTY OF YOUR HAIR

"Danderine" creates mass of thick, gleamy waves

In a few moments you can transform your plain, dull, flat hair. You can have it abundant, soft, glossy and full of life. Just get at any drug or toilet counter a small bottle of "Danderine" for a few cents. Then moisten a soft cloth with the "Danderine" and draw this through your hair, taking one small strand at a time. Instantly, yes, immediately, you have doubled the beauty of your hair. It will be a mass so soft, lustrous and easy to do up. All dust, dirt and excessive oil is removed.

Let Danderine put more life, color, vigor, and brightness in your hair. This stimulating tonic will freshen your scalp, check dandruff and falling hair and help your hair to grow long, thick, strong and beautiful.

What's Wrong With Canada

A Few Suggestions That Might Help To Improve Matters

Seeking an answer to the above question, Richard Irving, in the Farmers' Advocate, suggests that before we can make Canada an ideal and a cheaper place to live in, we may have to have:

More overalls and fewer dress suits.

More clay bricks and fewer gold bricks.

More alarm clocks and fewer "next morning" headaches.

More aprons and less decollette.

More producers and fewer consumers.

More democrats and fewer plutocrats.

More bank accounts and less oil stock.

More real work and fewer shortcuts to wealth.

More cheap coal and fewer diamonds.

More old-fashioned Christianity and less class snobbishness.

More real anxiety to assist humanity and less getting while the getting's good.

A Londoner made a wager that he could cook a plum-pudding ten feet beneath the surface of the Thames, and won the bet by placing the pudding in a in case and putting the whole in a sack of lime. The heat of the lime, slacking when it came in contact with the water, was enough to cook the pudding in two hours.

When

your mouth tastes like all the mean things you ever did—mixed together, then you need Beecham's Pills. Your mouth is a good indication of the condition of stomach and bowels.

FERD. T. HOPKINS & SON, Montreal

Take the Boys Into Partnership

A farmer out in Indiana, named Robert C. Cain, has formed his family into a firm, known as Messrs. Cain & Company, Unlimited, with a capitalization of $17,000. It is difficult to know why he chose the word "Unlimited," instead of "Limited," but, says the Farmers'-Sun, of Toronto, apart from that the principle of taking the boys and girls into partnership on the farm is an excellent one. In the past too few of our farmers have been willing to give the young people a part in the operations of the farm, and this has been a factor in the exodus to the cities. Having a stake in the farm is a big asset.

"I Wonder Would It Help Me?"

THIS question has been answered by many thousands of women who have found health and happiness in the use of Dr. Chase's Nerve Food.

Sleeplessness, irritability, nervousness, gloomy forebodings of the future, depression and discouragement—these are some of the symptoms which tell of exhausted nerves.

In order to avoid nervous prostration or some form of paralysis it is well to get the building up process established at once by use of Dr. Chase's Nerve Food.

50 cents a box, 6 for $2.75, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Dr Chase's Nerve Food

Allies to Execute Turkish Treaty By Military Force

San Remo.—The supreme council of the allies is fully prepared to execute the Turkish treaty by military force if necessary.

The council has accepted a plan drawn up for the employment of the allied armies by Marshal Foch, Field Marshal Sir Henry Wilson, British chief of staff, and General Badoglio, Italian chief of staff, who were present.

Two hundred thousand allied troops now are within the borders of the Turkish Empire, stategically disposed and these forces can be increaesd, if Turkish resistance is developed to any essential number. Greece will probably supply the largest number of troops.

Supplementary naval plans were also announced by the council to which Baron Beatty, commander of the British Grand Fleet, and Admiral Levavasseur, assistant to the chief of the general staff of the French navy, explained the plans in person.

The treaty does not include the final arrangements for mandatory states, They will simply be cut apart from Turkey and disposed of by the supreme council in the future.

The council has determined to leave Kurdistan part of Turkish territory for a period of two years and then decide whether to leave it with Turkey or make it a separate province under a mandate.

The council discussed the composition of military, naval and aerial commissions in Turkey. It gave to the military and naval experts the instructions necessary for preparation of data for compilation by the editorial committee on articles relative to the Turkish treaty.

Miners Riot at Butte

Fourteen I.W.W.'s and One Policeman Are Wounded

Butte, Mont.— Fourteen men, believed to be Industrial Workers of the World strike pickets, and one policeman, are in local hospitals suffering from gunshot wounds sustained in a battle on Anaconda road, near the Neversweet mine. Police officers believe two of the alleged Industrial Workers will not recover.

Police are searching for three other men said to have been wounded seriously. Striking miners are massed in Finlander hall and the street in front of the building. Feeling runs high. Police reserves have been called out.

For the Former Crown Prince

Amsterdam.—Negotiations with the Reformed Church at Wieringen for purchase of a local presbytery "as a permanent residence for the former Crown Prince of Germany," have been begun by the Dutch government, according to the Wieringen, correspondent of the Telegraaf.

Bridges Damaged Owing to Floods

Coal Stores in Calgary Are Running Pretty Low

Calgary.—From information secured from some of the coal operators in the Drumheller valley served by the Canadian Northern Railway, it will be a month before the bridges can be repaired sufficiently for the movement of traffic. It is stated that there are sixty-five bridges in a distance of twenty miles, and that fifteen of them are in a damaged condition owing to the floods. In some cases the bridges are submerged to a depth of more than four feet of water. Coal stores in Calgary are running pretty low, as the bulk of the coal used here comes from Drumheller. The principal supplies are now coming from the Edmonton district.

Indemnities for Canada

Canada's Claim Against Germany Is Now Being Computed

Ottawa.— The amount of Canada's indemnity from Germany is now being computed for presentation to the tribunal created under the peace treaty, for considering such things.

Hon. N. W. Rowell, in answering a series of questions by Thomas Hay in the house, stated that the treaty of peace limits and defines the classes of claims which may be presented by the allied and associated powers against Germany. In so far as Canada has expended money or incurred obligations covered by the treaty, she has a claim.

The government is taking the necessary steps to see that the claims are properly presented. He stated that it is not true that Australia and other British colonies have all received additional territory by way of indemnity Australia, New Zealand and South Africa will be named as mandatories under the League of Nations in respect to certain territories which Germany has been requested to surrender.

Letter on Abandoned Ship

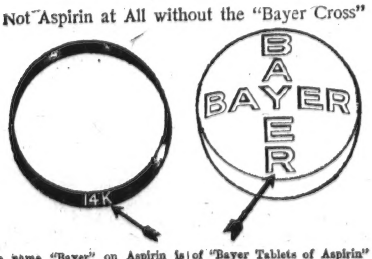
Message Found on Board Bids 'Goodbye to Everyone For Evermore

Prince Rupert.—The boat, McDuff, which ran ashore at Alford Bay with no one on board is on her way here, being sailed by an Indian. A letter was found addressed to Mrs. Anne Bronmpton, 176 Burgess street, Grimsby, England, saying:

"Engine broken, rudder smashed, drifting to Hecaste Straits, storm. Bidding good-bye to everyone for evermore."

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"



The name "Bayer" on Aspirin is like 14 Karat on gold. It positively identifies the only genuine Aspirin,—the Aspirin prescribed by physicians for over nineteen years and now made in Canada.

Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally.

Tin boxes of 12 tablets cost but a few cents. Larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Exhibition Munitions Are Guaranteed

Question of Compensation for Man Killed At Parry Sound is Under Consideration

Ottawa.— The Government has a guarantee that all active munitions returned from overseas are properly examined and guaranteed to be harmless before being used for exhibition purposes. This information was given to James Arthurs, of Parry Sound, in the house of commons the other day.

Mr. Arthurs asked whether a claim had been made for compensation for the death of Mr. Alves, who was killed at Parry Sound fall fair by the explosion of a trench mortar supposed to be harmless. He was told that such a claim had been made and that the question of making provision for the family of Mr. Alves was under consideration.

Canadian Missionary Killed

Dr. Menzies of Toronto, Slain While Defending Women in China

Vancouver.—A serious situation has been created in Honan, China, as a result of the murder by bandits of Dr. James Menzies, M.D., C.M., and Chao Tih, the military governor, has been severely censured by the Pekin authorities for his inability to protect foreigners' lives and property. This information has just been received by the World.

Dr. Menzies came from Toronto, where his wife is now residing, and for more than 20 years was a missionary in China. He expired shortly after being wounded, when defending some women missionaries against robbers.

Germans Would Increase Army

Want to be Allowed to Retain All Officers and Staff

Paris.—Germany has asked the inter-allied conference at San Remo to increase from 100,000 to 200,000 men the standing army provided for Germany by the terms of the Treaty of Versailles.

The request was contained in a note handed to the French foreign office last evening with the demand that it be sent to the supreme council at San Remo.

The note set forth that an increased force was necessary for the maintenance of order in the interior and that, fundamentally, the army would not accept an order for its dissolution.

The note further requests that Germany be allowed to retain the entire general staff and corps of officers, which means the entire framework of the active army.

Two other notes were handed to the foreign office at the same time. One dealt with the disbandment of the civic guards, which has already been made public, and the note contained a request that the reichswehr force in the neutral zone should be fixed according to the number of men instead of the number of units, and that Germany be allowed to have 11 batteries of artillery instead of two in the neutral zone.

Universal Shortage

Dr. Robertson Tells Committee Of Abnormal World Demand

Ottawa.—In an address before the parliamentary committee on agriculture and colonization, Dr. J. W. Robertson, said it would take at least two big crops to catch up to anything like normal supplies of breadstuffs; ten years to obtain a pre-war status on milk products, and four or five years for beef products.

Dr. Robertson went at length into his experience overseas, reiterating his statements that prices were dependent entirely upon world conditions. Increased production in Canada would not lower prices because of continued abnormal demand.

Britain May Sell Warships

London.—Walter Hume Long, first lord of the admiralty, replying to a question in the house of commons today, said the government contemplated selling some warships to foreign countries. Pending the outcome of negotiations, however, he added, particulars could not be divulged.

Will Take Some Definite Action On Natural Resources

Ottawa.— Indications here point to the firm belief among western members of parliaments that the government intends to take some definite action along the line of natural resources before the close of the present session.

Headed by those who have been pressing for such action, a deelgation of some forty-five supporters of the government, waited on the government, the cabinet members present included Sir George Foster, acting premier; Hon. Arthur Meighen, H. A. Drayton and C. C. Ballantyne. It was urged that the governmnet should immediately consider undertaking some policy whereby the mineral development of the country will be extended and whereby all the operations already made in the house will be implemented by effective action, on the ground that this would be one of the possible methods of increasing the population, lessen the taxes, enhance the property, secure a market for agricultural products, provide employment where it is badly needed, furnish freight for the already overdeveloped railways, make Canada commercially independent of the United States and generally help to give Canada its proper place among the advancing industrial nations of the world.

It was also strongly urged that there has sprung up throughout the entire country an insistent demand for the development of the natural resources. The government is understood to have replied that it was already cognizant of the arguments put forth and that some definite announcement of policy could be expected before the close of the present session. Practically every province was represented at the conference.

It is the intention of the government to transfer to Alberta, Saskatchewan and Manitoba, their natural resources as soon as terms fair and equitable to all other provinces of the Dominion can be arranged. This information was given to J. A. Campbell, of Nelson, in the house of commons. Mr. Campbell was told that it had been the policy of the government to make this transfer ever since its formation. Parliamentary action was necessary to effect this transfer.

U.S. And Britain Would Trade With Russia

Sir Auckland Geddes Declares Progress Is Being Made Cordially

Washington.—Negotiations between the State department and the British foreign office, concerning the proposed re-opening of trade relations with soviet Russia are proceeding and progress is being made cordially. Sir Auckland Geddes, the new British ambassador made this announcement The question of the recognition of the present government of Russia is entirely apart from these conferences, it was said.

It is the purpose of Britain and America to arrive at an agreement as to means of expanding the trade already being carried on with Russia through Scandinavian countries and by way of Finland and Lettvia. While the plan to be adopted has not assumed shape it is regarded as probable that the old license system will be abandoned entirely or so liberalized as to leave but little restraint on the channels of trade.

It is fully understood in London and Washington that in furtherance of its determination to force political recognition at the hands of the western European nations and America, the soviet government will do everything possible to hamper such trade development along independent lines. The negotiators are believed to feel however, that Lenine will scarcely be prepared to refuse the demands of his own people for the essentials of life which are held out to them in this way.

Strikers' Meeting Is Broken Up

Gathering Broke Up in Uproar After Leaders Had Been Howled Down

Chicago.— John Grunau, leader of the outlaw Chicago yardmen's association, who was released from jail at Joliet, Ills., after friends had deposited $10,000, was expected to call a new meeting of striking switchmen to end the walkout, following the tumultous termination of a mass meeting, called by a committee of strike leaders to vote on returning to work.

Declaring they had been "sold out" and hooting down attempts of strike leaders to appeal to them to end the walkout, several thousand strikers bolted a mass meeting when it was announced Grunau, who was to have presided, was still in jail.

The gathering broke in an uproar, Tumult reigned inside and outside the hall for half an hour, but there was no violence and no arrests were made.

Shannon Jones, R. S. Murphy, and M. J. Kenney, who called the meeting, urged the strikers to return to work and await action of the railroad labor board on their demands for increased pay.

"I hope that you can see that it won't do any good to fight the government," Jones told the strikers. "You can fight the railroads, but not the United States, and you are foolish to try."

On the rostrum was an American flag. Jones touched it constantly as he spoke. As Murphy began to speak he was greeted with cries of "Where's Grunau? We want Grunau!"

Great Britain Helps Argentine

Buenos Ayres. — La Razon, commenting on the fact that the British government is loaning Argentina $50,000,000 to pay off a loan of the same amount by New York bankers, after the latter had refused to renew it, criticises the lack of indulgence on the part of the north American bankers. The newspaper says this means that Argentina in future financing will turn again to England, "the traditional indulgence mecca of our country."

Loss Owing to Strikes

London.— Thomas J. MacNamara, minister of labor, told the house of commons that the strikes and lockouts reported to the ministry of labor during 1919, aggregated 1,413. The total numbers of persons directly or indirectly affected was 2,580,000. The aggregate duration of the disputes was 34,430,000 working days, figuring on the basis of individual loss of time.

"SYRUP OF FIGS" CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California."

$10,000 For A Carload of Flax

A carload of flax sold at Winnipeg, Manitoba, a few days ago, brought its owners a total of $10,719.18. The car contained 1,821 bushels and sold at $5.58 a bushel.

This is believed to be the highest price ever obtained in Winnipeg for a single carload of grain.

It sometimes happens that a man is called the mainstay of the home because he does not know when to come home.

One Great Essential To a Woman's Health Is Her Nerves

Nature intended women to be strong, healthy and happy as the day is long, instead of being sick and wretched. But how can any woman be healthy and happy when the whole nervous system is unstrung. The trouble is they pay more attention to their social and household duties than they do to their health. Is it any wonder then that they become irritable and nervous, have hot flushes, faint and dizzy spells, smothering and sinking spells, become weak and nervous, and everything in life becomes dark and gloomy.

Milburn's Heart and Nerve Pills are the very remedy that nervous, tired-out, weary women need to restore them to the blessings of good health.

Mrs. P. H. Ryan, Sand Point, N.S., writes: "I have been a great sufferer from nerve troubles. I was so weak and nervous I could not sleep at night and my appetite was very poor. I could not walk across the floor without trembling. I had hot flushes and fainting spells. When I was on my second box of Milburn's Heart and Nerve Pills I began to feel better and kept on until I had used six boxes, when I felt like a different person. I am never without them in the house and recommend them to all who suffer with their nerves."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The British Character

Says British Reserve is Really Just "Shyness"

Frederic W. Wyle, American newspaper correspondent, who represented the London Daily Mail, and its associated papers in Germany, addressing the Canadian Club, said that, after 20 years of thinking it over, he had at last begun to understand the British character. Mr. Wyle said that what Americans thought coldness and reserve in the Englishman was really shyness.

Mr. Wyle, who is of Irish descent, said he sympathized with the Irish race, but any deal with the Irish must be a square deal within the British empire. It was a political necessity he said, that Ireland must remain within the British Imperial system. Great Britain could not give complete territorial independence to Ireland, Mr. Wyle declared.

That Faded Frock Will Dye Like New

"Diamond Dyes" Freshen Up Old, Discarded Garments

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods—dresses, blouses, stockings, skirts, children's coats, feathers' draperies, coverings—everything!

The Direction Book with each package tells how to diamond dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

Transition in Russia

Lenine, in a recent public address, complains that the peasants are showing capitalistic tendencies and are becoming a bourgeoisie. A man who cultivates a plot of land and secures a crop naturally feels that he ought to own what his toil has produced. Why should he not? Communism under trial always will break to pieces against that human instinct, as it always has broken.—Buffalo Express.

Minard's Liniment Relieves Neuralgia

Canada's Population

Next Census Likely to Show A Population of Considerably Over Nine Million

Canada's next census is likely to show a population or the Dominion of over nine million people. Figures recently published and based on departmental estimates, gave the population of the Dominion as 8,835,102. While these estimates in the past have proven approximately correct, it is to be pointed out that they covered a period which ended on March 31, 1919 nearly a year ago. Since that time there has been a great influx of people to Canada.

The major portion of Canada's overseas forces around the four hundred thousand mark, has returned to Canada since that date, and immigration from Great Britain, which languished during the war years, has revived to a considerable extent. There has also been a considerable movement from the United States. With the return of such a large portion of the male population from overseas the natural increase should be much in excess of the period from 1914 to 1919. With all these factors considered, it would not be surprising if even the estimate of nine millions should be greatly exceeded.

Explained

"Walter, why do you bring me this same potato day after day?"

"Well, sir, you never eat it."—London World.

W. N. U. 1313

Immigration Of Children to Canada

The Migration of Children From Orphanages to the Dominion

The Manchester Guardian, commenting on the report of the Canadian Government's inspector of British immigrant children, expresses gratification that the migration of children from orphanages to the Dominion appears shortly to be resumed. Since 1916 this migration was practically suspended, the report shows.

The paper outlines the unusual opportunities offered in Canada, both in industries and agriculture, and points to the increased number of children now in institutions as a result of the war as an argument for again opening the gates of Canada to the youthful immigrant.

More than ten thousand applications for children have been received by the child-saving institutions in England since the annual migration was suspended. Many of these applications are from agricultural districts, it is said, and a large portion of the applicants are childless.

How's This?

We offer $100.00 for any case of catarrh that cannot be cured by HALL'S CATARRH MEDICINE.

HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System.

Sold by druggists for over forty years. Price 75c. Testimonials free.

F. J. Cheney & Co., Toledo, Ohio.

India and Ceylon tea are graded according to the position of the leaf on the plant, the lower the leaf the poorer the quality.

Minard's Liniment Cures Burns, etc.

Cotton has been grown in Egypt since 200 B.C., but it was not until n hundred years ago that Jumel, a French engineer, suggested the introduction of the commercial varieties. In 1822 the famous American Sea Island cotton was first sown. Five years later a Brazilian variety was introduced. The two strains were mingled and from them came the famous "Ashmouni" plant, and the still finer "Mutaffi," which is one of the most productive cottons in the world.

DIGESTIVE TROUBLES CAUSE DISTRESS

But They Are Nearly Always Due To Thin, Watery Blood

Do not think that because your stomach is easily upset you are the victim of some serious malady. One of the most common predisposing causes of indigestion is anaemia, or thin, watery blood. In fact it has become generally recognized that healthy activity of the stomach is impossible unless the blood is rich and red.

Dr. Williams Pink Pills have been found most valuable in cases of indigestion, nervous dyspepsia and stomach weakness, just because they are a blood builder and nerve tonic. The rich, red blood they make not only imparts a healthy digestion, but carries color to the cheeks and lips and gives vigor to the muscles. One important point to remember is that Dr. Williams Pink Pills contain no harmful drugs or opiates and are thus to be preferred to preparations that merely stimulate for a time. Before you begin worrying unnecessarily about your state of health, try the tonic treatment of Dr. Williams Pink Pills You will be surprised to see how rapidly your whole debilitated system revives, as the new, rich blood courses through your body. Here is the statement of one person among thousands who have used Dr. Williams Pink Pills to their own great advantage. Mrs. A. Veniot, Homford, N.S., says: "For about two years I was a great sufferer from indigestion, which seemed to carry with it a complication of other troubles. Every meal I took brought with it misery, as it was followed by pain, and sometimes nausea and vomiting. At other times gas would form in the stomach to such an extent that my heart would palpitate at an alarming rate. These conditions brought on extreme nervousness and irritability, and I found my general health so much affected that the least exertion would tire me, and I slept but poorly. I had been doctoring for several months with no result beyond slight temporary relief, when I was advised by a friend to try Dr. Williams Pink Pills. I decided to follow this advice and got a half dozen boxes. Good results soon began to show from this treatment, and the further continued use of the pills have made me a well woman. I can cheerfully recommend Dr. Williams Pink Pills to similar sufferers."

You can procure Dr. Williams Pink Pills through any dealer in medicine or they will be sent you by mail at 50 cents a box or six boxes for $2.50 by writing direct to The Dr. Williams Medicine Co., Brockville, Ont.

BAR U AND NAMAKA FARM PERCHERONS

The largest stud of the Pure-bred Percherons in the World. The first Percheron-breeding Farm Established in Canada. The only firm on the American continent from which British horsemen have selected Percheron breeding stock to establish studs in Britain.

Do not let the British breeders come to Canada and carry off all our best foundation stock. Do not be satisfied with the cheap cull stallions brought in by irresponsible dealers and stallion pedlars from the United States, when you can buy the best individuals of the best breeding raised right here in Alberta by men that have been in the breeding business for 25 years, and expect to remain in the business. We have seventy-four head of Pure-bred Percheron Stallions of our own breeding now on hand to select from. You can see their sires and dams, and if you cannot choose one from the lot to suit you we will give you every assistance in our power. Write for prices or come to Calgary Alberta, and we will meet you and show you the stock at any time.—Address:

GEORGE LANE (Desk B.), CALGARY, ALBERTA

FARMERS BREED PERCHERONS

The only breed of draft horses ever shipped back to England from Canada for breeding purposes were Percherons.
The greatest breed of draft horses in North America are Percherons.
The safest investment in draft horses today is Percherons.
A profit to own—A pleasure to handle.
You will make no mistake in your horse breeding this year if you use a Percheron sire.

WRITE FOR INFORMATION AND LITERATURE
Let us put you in touch with the best Canadian Percheron Breeds.
Mention this paper when writing.

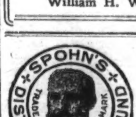
HORSEMEN FOR 26 YEARS HAVE RECOMMENDED



Spohn's Distemper Compound

for DISTEMPER, INFLUENZA, PINKEYE, COUGH OR COLD. Twenty-six years' use among the best horsemen in America has given the COMPOUND an enviable record as a preventive and cure. A few drops daily will keep the animal in condition and his system will resist disease. Regular doses prescribed will cure. Buy of your druggist.
SPOHN MEDICAL COMPANY, Goshen, Ind., U.S.A.

Farm Land Boom To Fill Every Farm

Move to Encourage Farmers to Take Up Vacant Lands

The executive of the Saskatchewan Farm Settlement Association has completed plans for the biggest conference ever held in the province of Saskatchewan to take place in Saskatoon May 25 to 28 inclusive. Under the slogan of "A farmer on every vacant farm inside of five years," the officials of the association are aiming to make this year's conference a record breaker and one which will go a long way towards encouraging farmers to take up the vacant land in the province.

The premiers of the four western provinces have been invited to attend this conference, as well as the governors of the Northwestern, Central and Border States. It is intended as a get together meeting of the people most vitally interested in the forward movement in agriculture and promises to bring about satisfactory results.

At the conference several subjects of serious import to the farmers of the province will be discussed by experts who have already promised to attend. Among the subjects will be dry farming, agricultural credits at a low rate of interest and mutual co-operation between large land owners in assisting to place farmers on the vacant land of the province.

J. H. Haslam, who for years has been one of the most energetic workers in the cause of the west, is the moving spirit in the organization of this conference. Mr. Haslam, who has a large clientele in the United States, has been assured that a large number of well-to-do farmers from across the border desire to investigate farm land prices in Saskatchewan with the end in view of establishing themselves here. Prices of farm lands in the Dakotas, Iowa and the northwestern states, have increased to such a level that farmers find it quite profitable to sell out and re-invest their money in the best wheat growing lands in the world.

Should Teach Finance

Somewhere in our school courses there ought to be the opportunity to learn about the essential conditions of safe investment, rates of interest, and proper ways of saving. To beware of large interest and to guard little expenses are lessons as much as ever needed to day as when Benjamin Franklin taught them. A man who has savings wisely invested has a stake in the welfare of his country and an anchor to the windward for himself.—Minneapolis Journal.

Useful

Statisticians say that there are 25,000 Canadians who can neither read nor write. But if they can work, they will still be of great value to the country. Many of those who can read and write in a dozen languages are useless when it comes to production.

MONEY ORDERS

It is always safe to send a Dominion Express Money Order. Five dollars costs three cents.

Wantmore Peanut Sandwiches

Take Fowler's Wantmore Blanched Salted Peanuts and reduce them to a powder in a meat chopper. Mix the crushed nuts with fresh cream cheese. If the paste is a little hard, soften with a little cream. Spread the paste between unbuttered Graham Bread. Be sure and use Fowler's Wantmore Blanched Salted Peanuts, as no other peanuts will make them so good.

KNITTING YARN. OUR FINest Red Cross quality in sixteen colours. Twenty cents per skein. Sample mailed twenty-five cents. Georgetown Woollen Mills, Georgetown, Ontario.

When We Grow Shorter

A person usually begins to lose height at the age of fifty, and at the age of ninety he has lost about one and a half inches.

In after years a self-made man likes to boast about the hard struggle he had on a farm when he was a boy.

SPRING FEVER

Following Colds, Grip or Flu, Thin, Watery or Poisoned Blood

(By Dr. Valentine Mott.)

At this time of year most people suffer from what we term "spring fever" because of a stagnant condition of the blood, because of the toxins (poisons) stored up within the body during the long winter. We eat too much meat, with little or no green vegetables.

Bloodless people, thin, anemic people, those with pale cheeks and lips, who have a poor appetite and feel that tired, worn or feverish condition in the spring-time of the year, should try the refreshing tonic powers of a good alterative and blood purifier. Such a tonic as druggists have sold for fifty years, is Dr. Pierce's Golden Medical Discovery. It is a standard remedy that can be obtained in tablet or liquid form. Made without alcohol from wild roots and barks.

Tillsonburg, Ont.—"Ever since I can remember Dr. Pierce's medicines were used in our family at home and they never failed to give good results. The 'Golden Medical Discovery' was used as a tonic and blood purifier and for bronchial trouble and it proved excellent. I have personally taken it for bronchial trouble and the 'Favorite Prescription' to build me up when I was run-down and they were both very beneficial."—Mrs. Clifford Mitchell.

Get Full Plow Value Behind Your Tractor

No matter how good your tractor may be, you have to depend upon the plow behind the tractor for the important direct work of seed bed-making.

It pays to be especially careful in choosing your tractor plow.

We offer you the opportunity to get a John Deere Tractor Plow—the plow that has more than 80 years of successful plow-making experience behind it.

If you will come in and investigate this plow we are sure you will agree with us that it is the best tractor plow for you to buy—that it will last longer than any other tractor plow and will give you better results while you are using it.

Especially, we would like to have you investigate these important features:

How the genuine John Deere bottoms are particularly adapted for thorough seed bed-making and longer service.

Why the John Deere Quick Detachable Shares save time and labor and *stay close fitting.*

How the simple, dependable power lift device, that raises the bottoms high and level, works without troublesome chains or sprockets.

How the bottoms reach full plowing depth immediately when lowered and are locked down to this depth while plowing.

How the unusual clearance assures steady work in trashy land.

How the simple, strong construction throughout assures maximum length of service and minimum repair costs.

How the hitch adapts it for successful use with any tractor.

We can furnish this plow in two, three and four-bottom sizes.

Remember, you need the best tractor plow you can get.

Come in and see our John Deere Tractor Plow
